

At Hinsdale Orthopaedics, You Now Have a New Choice in MRI

The new open bore design of the **MAGNETOM Espree** accommodates all size patients and eliminates anxiety and claustrophobia. For many exams, your feet go in first and your head remains outside of the system. That has never been possible before in High Field.

This new open bore **High Field** magnet has 5 times greater resolution than other conventional open magnets. This latest technology assures that your doctor gets the **most confident diagnosis.**
